

KUNAL VERMA

Senior Full Stack Engineer | React.js | Next.js | Node.js | TypeScript | GenAI & RAG

Indore, Madhya Pradesh, India | +91 6266155742 | kunalv899@gmail.com
[linkedin.com/in/kunalv899](https://www.linkedin.com/in/kunalv899) | github.com/kunalv899 | kunalportfolio.wasmer.app

PROFESSIONAL SUMMARY

Full Stack Engineer with 5+ years of experience designing, building, and shipping production web applications across HRTech, FinTech, Healthcare, and E-commerce. Builds features end to end — React.js, Next.js, and TypeScript on the client, Node.js, Express, GraphQL, PostgreSQL, and Redis on the server. Ships production GenAI features, including LLM API integration, retrieval-augmented generation (RAG) pipelines, embeddings, and vector similarity search in TypeScript-based stacks. Delivered platforms serving 500+ enterprise clients, reduced application load times by 45%, and cut contract processing errors by 65%. Strong in REST and GraphQL API design, relational data modeling, caching and query optimization, CI/CD automation with Docker and AWS, and mentoring engineers in Agile teams.

TECHNICAL SKILLS

AI & GenAI: LLM API Integration (OpenAI, Anthropic Claude), Retrieval-Augmented Generation (RAG), Embeddings, Vector Databases, Vector Similarity & Semantic Search, Document Chunking Strategies, Context Assembly, Prompt Engineering, Streaming AI Responses, Structured Output Validation (Zod), Token & Cost Optimization, AI-Assisted Development (GitHub Copilot, Cursor, Claude Code)

Languages: TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3

Frontend: React.js, Next.js (SSR, SSG, ISR), Redux Toolkit, React Query (TanStack Query), Zustand, Context API, Tailwind CSS, Material UI, Styled Components, Storybook, Framer Motion, Micro-frontend Architecture

Backend & APIs: Node.js, Express.js, REST API Design, GraphQL (Queries, Mutations, Subscriptions), WebSockets, Microservices, Server-Side Rendering, Authentication & Authorization

Databases & Search: PostgreSQL, SQL Query Optimization, Data Modeling & Normalization, Redis, Elasticsearch, Vector Search / Embedding Storage

DevOps & Cloud: Docker, AWS (S3, EC2), GitHub Actions, CI/CD Pipelines, Git, GitHub, Webpack, Vite, ESLint, Prettier

Testing: Jest, React Testing Library, Unit Testing, Integration Testing, End-to-End Testing, Cross-Browser Testing

Security: JWT Authentication, Role-Based Access Control (RBAC), Secure Token Management, XSS Prevention, CSRF Protection, CORS, OWASP Top 10, HTTPS

Performance: Lighthouse, Chrome DevTools, Web Vitals, Core Web Vitals, Bundle Analyzer, Performance Profiling, Caching Strategies

Tools & Practices: Figma, Postman, Strapi CMS, Shopify, Shopify Hydrogen, Magento APIs, Agile/Scrum, Code Reviews, Design Systems, WCAG Accessibility, Technical Documentation

PROFESSIONAL EXPERIENCE

Senior Full Stack Engineer — Sequifi Technologies

February 2025 – Present

Indore, Madhya Pradesh

- Architected and delivered a scalable multi-tenant HR lifecycle SaaS platform serving 500+ enterprise clients, increasing user engagement by 20% through Agile, cross-functional delivery.
- Shipped a production GenAI feature on the HR platform by integrating LLM APIs with a retrieval-augmented generation pipeline, covering document chunking, embedding generation, vector similarity search, and context assembly to ground model responses in company knowledge and reduce hallucinations.
- Built the AI feature end to end in TypeScript, implementing streaming response UI in React, structured output validation, and authenticated LLM routes with role-based access control.
- Built a modular Next.js and React.js application using feature-based architecture, dynamic imports, and route-level lazy loading, reducing initial load time by 45% while sustaining Lighthouse scores above 90 and passing Core Web Vitals.
- Designed and implemented real-time services for a multi-stage hiring pipeline using GraphQL subscriptions and WebSocket-backed push notifications, reducing average hiring time by 50% across 2,000+ active candidates.
- Developed an Employee Contract Management System with dynamic form generation, audit trails, and e-signature API integrations, reducing contract processing errors by 65%.
- Delivered a digital employee onboarding platform with document uploads, e-signatures, workflow automation, and progress tracking, cutting onboarding time from 5 days to 2 days and increasing completion rates by 78%.
- Defined REST and GraphQL API contracts, versioning strategy, and error-handling standards with backend teams, and integrated Stripe payments, background-verification, and e-signature providers behind clean service abstractions.
- Built a reusable UI component library of 50+ production React components documented in Storybook, reducing frontend development effort by 35%.
- Improved application responsiveness by 30% using normalized Redux Toolkit state, entity adapters, and memoized selectors (Reselect) to eliminate redundant API calls.
- Implemented JWT authentication, role-based access control (RBAC), secure API communication, and XSS/CSRF protection across the platform.
- Owned Git workflow, pull request review, and CI/CD release process, and mentored 3+ junior engineers on coding standards, testing, and performance profiling.

Full Stack Developer — Growisto

May 2022 – February 2025

Mumbai, India (Remote)

- Built and shipped an enterprise Admin Dashboard and Status Management System for HDFC Bank (Banking-as-a-Service), automating real-time workflows and status tracking to reduce manual operational effort by 50% and SLA delays by 30%.
- Enhanced REST APIs, introduced Redis caching, and optimized SQL queries to reduce response times and backend server load across high-traffic banking services.
- Delivered a Corporate Partner Portal with multi-role authentication, Elasticsearch-powered search, and dynamic approval workflows, improving onboarding submission speed by 20%.
- Rebuilt customer authentication and account management on a secure token-based architecture, reducing login failures by 30% and increasing customer retention by 15%.
- Developed a Loyalty & Rewards Platform with real-time point tracking, tier-based rewards, and redemption workflows, increasing customer engagement by 20%.
- Managed complex application state with Redux Toolkit and React Query, keeping performance and data consistency stable through high-traffic sale events.
- Built the company website with Next.js SSR and SSG and integrated Strapi as a headless CMS, growing organic traffic by 50% in three months and improving marketing publishing efficiency by 40%.
- Partnered with backend teams on API design and contract definition, improving maintainability across enterprise banking applications.

React.js Developer & Shopify Consultant — AI Trillion

August 2021 – May 2022

Indore, India

- Optimized Shopify storefront performance for brands including Aakash Namkeen and Indian Milk & Honey, delivering 15% performance improvements.
- Reduced page load times by 20% through lazy loading, asset optimization, and image compression, improving Core Web Vitals and customer experience.
- Built reusable React.js components integrated with Shopify Liquid templates to standardize storefront UI across client projects.

Shopify Developer — Parkhya Solutions

January 2021 – July 2021

Indore, India

- Developed custom Shopify themes, reusable UI components, and third-party integrations across multiple client projects.
- Delivered responsive, cross-browser compatible storefronts, improving project delivery efficiency through a reusable component architecture.

EDUCATION

Bachelor of Engineering in Computer Science 2020

BM College of Engineering, Indore, India

CERTIFICATIONS

-
- Advanced React.js Patterns & Performance Optimization
 - TypeScript & Modern JavaScript Mastery
 - Redux Toolkit & State Management Best Practices
 - Responsive Web Design & Accessibility Standards (WCAG)
